“PERSONAL HYGIENE PROFILE OF STREET FOOD VENDORS AT
STATE ELEMENTARY SCHOOL 47 JAMBI IN 2025”**

ABSTRACT

Street food vendors in the school environment play an important role in providing food for students. However, lack of attention to personal hygiene can become a source of food contamination that endangers children's health. The objective of this research is to determine the profile of personal hygiene among street food vendors at State Elementary School 47 in Jambi City in 2025, covering nail cleanliness, clothing cleanliness, smoking habits, and handwashing practices.

This descriptive study was conducted on vendors at the canteen of State Elementary School 47 Jambi City. The sample consisted of 14 street food vendors using a checklist.

The results showed that 91% of vendors had adequate nail cleanliness, 83% had good clothing cleanliness, 100% had smoking habits while selling, and 76% had adequate handwashing practices.

The conclusion of this study is that the majority of vendors met the requirements for nail cleanliness, clothing cleanliness, and handwashing practices; however, all vendors still had smoking habits while selling. Continuous education and supervision are needed to enhance awareness of personal hygiene in order to maintain food quality and student health in the school environment.

“ GAMBARAN HYGIENE PERORANGAN PEDAGANG JAJANAN DI
SEKOLAH DASAR NEGERI 47 JAMBI TAHUN 2025”**

ABSTRAK

Pedagang jajanan di lingkungan sekolah memiliki peranan penting dalam penyediaan makanan bagi siswa. Namun, kurangnya perhatian terhadap hygiene perorangan dapat menjadi sumber kontaminasi makanan yang membahayakan kesehatan anak-anak. Tujuan penelitian ini untuk mengetahui gambaran hygiene perorangan pedagang jajanan di Sekolah Dasar Negeri 47 Kota Jambi tahun 2025, meliputi kebersihan kuku, kebersihan pakaian, kebiasaan merokok, dan perilaku cuci tangan.

Penelitian deskriptif ini dilakukan pada pedagang di kantin SD Negeri 47 Kota Jambi. Sampel berjumlah 14 pedagang jajanan dengan menggunakan checklist.

Hasil penelitian menunjukkan bahwa 91% pedagang memiliki kebersihan kuku yang memenuhi syarat, 83% memiliki kebersihan pakaian yang baik, 100% memiliki kebiasaan merokok saat berjualan, dan 76% memiliki perilaku cuci tangan yang memenuhi syarat.

Kesimpulan dari penelitian ini adalah sebagian besar pedagang telah memenuhi syarat kebersihan kuku, pakaian, dan cuci tangan, namun seluruh pedagang masih memiliki kebiasaan merokok saat berjualan. Diperlukan edukasi dan pengawasan berkelanjutan untuk meningkatkan kesadaran hygiene perorangan demi menjaga kualitas makanan dan kesehatan siswa di lingkungan sekolah.
